Be the Difference for Someone You Love (from the American Heart Association website)

If you are called on to give CPR in an emergency, you will most likely be trying to save the life of someone you love: a child, a spouse, a parent or a friend. 70 percent of out-of-hospital cardiac arrests happen in homes. Unfortunately, only about 46% of people who experience an out-of-hospital cardiac arrest get the immediate help that they need before professional help arrives.

To register, please complete the form below with a check to Susan Robinson by Nov. 20. Class is limited to the first 8 who register for the class. Questions? Contact Susan Robinson at suskie.robinson@gmail.com or at 612-802-4179 (cell/text).
